NEW BOOK ADVANCE INFORMATION

Pests, Diseases and Disorders of Peas and Beans — A Colour Handbook

Anthony J. Biddle
 P.G.R.O., Peterborough, UK.

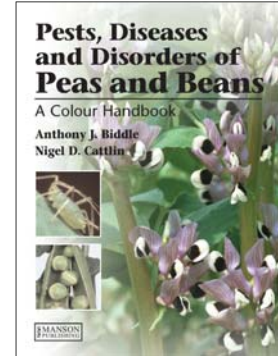

Nigel D. Cattlin
 Holt Studios, UK

Anthony Biddle is among the most respected scientists in the pea and bean industry worldwide. Nigel Cattlin has an international reputation for agricultural and horticultural photography of the highest order. They have created between them a concise and practical guide to the protection of pea and bean crops, with descriptions of symptoms linked throughout to photographs and to notes on prevention and control.

The book deals systematically with pests, and with the fungal, bacterial and viral diseases affecting peas and beans from seedling to produce. It assists the reader in the early and rapid recognition of problems and provides guidance in dealing with them.

Pests, Diseases and Disorders of Peas and Beans is of value to all growers, advisory plant specialists, diagnostic clinicians, and agribusiness representatives who have an interest in these crops.

Contents: Foreword by John W. Kraft, Section 1 – Introduction, Peas and Beans in Agriculture, Pea and Bean Production, Quick guide to diagnosis, Section 2 – Diseases of Seedlings and Young Plants, Section 3 – Pests of Seedlings and Young Plants, Section 4 – Fungal and Bacterial Diseases, Section 5 – Viral Diseases, Section 6- Pests of Stem, Foliage, and Produce, Section 7 – Seedling and Crop Disorders.
